

**Future Projects:** As we celebrate our 10<sup>th</sup> year, the Arizona K-12 Center has learned that our mission is more critical than ever. Teachers are hungry to excel. Students are in dire need of empowered educators. This is true not just in Maricopa County, but in every corner of the state.

To meet this burgeoning demand, we've collaborated with widely varied organizations, districts, schools and teachers. We thank our partners throughout Arizona and reaffirm our commitment to delivering and supporting the very highest quality professional development.

Our ten years in operation also afford us a clear perspective looking ahead. Arizona's teachers need more opportunities for excellence, not less. So our priority moving forward is to expand our offering to educators and to broaden our engagement with teacher leaders on issues of teacher quality and student achievement.
